kamveergrewal.github.io
647-425-1138

Aspiring fintech professional with a strong foundation in data structures and programming, pursuing expertise in business analysis and data modeling and analysis.

Highlight of Skills

Python, SQL, Java, Assembly (RISC-V), Visio, Tableau, Microsoft Excel, PowerPoint, Scrum, Waterfall, Agile, Git, Fluent in English, Punjabi, Hindi and French

Education

University of Toronto Mississauga - Mississauga

2024 – Present

Bachelor of Science: Applied Statistics

Minor: Applied Mathematics and Physics

Relevant Projects

Machine Learning Model for Sports Performance Forecasting

Jan 2026 - Present

- Developing an end-to-end machine learning pipeline using XGBoost to forecast NBA player performance.
- leveraging Claude AI to accelerate development, debugging, and feature iteration

Credit Card Recommendation Engine

Dec 2025 - Dec 2025

- Built a Python-based decision tool that analyzes user spending habits to recommend optimal credit products based on rewards structures and fees.
- Implemented logic to compare multiple variables (cashback rates, annual fees) to maximize user financial returns

Interactive Java GUI Application (Academic)

Nov 2025 - Nov 2025

- Engineered a modular Java application within a Scrum team of 5, delivering a fully functional product ahead of schedule.
- Enforced Clean Architecture standards and version control best practices (Git/GitHub) to minimize merge conflicts and technical debt.

Work Experience

Data Engineer (Remote) – University of Toronto

Oct 2025 - Present

- UT Autonomous Scale Racing (UTASR) team
- Oct 2025 - current UTSG
- Collaborating with the engineering team to implement data modeling best practices. Designing data schemas
- to organize telemetry data for autonomous vehicles.
